

MaskShift AAAI-27 Target-Readiness Dossier

Anonymous

1 Target Facts

Target venue: AAAI-27 Main Technical Track. Paper submission site opens 2026-06-24; abstract deadline 2026-07-21 23:59 UTC-12; full paper deadline 2026-07-28 23:59 UTC-12; supplementary material and code deadline 2026-07-31 23:59 UTC-12. Technical content limit: up to 7 pages plus references.

Source: <https://aaai.org/conference/aaai/aaai-27/main-technical-track-call/>.

2 Current Package State

Generic main PDF pages: 8. Current document class: `\documentclass[10pt]{article}`. AAAI style present: `False`.

Gate	Status
M5	STRONG_CONFERENCE_READY
M15	PASS_FINAL_INTEGRITY
M17	PASS_SUBMISSION_SUPPLEMENT
M18	PASS_SUBMISSION_POLICY_PACK
M20	PASS_AAAI27_PREFLIGHT_CONVERSION
M21	PASS_AAAI27_REPRODUCIBILITY_CHECKLIST

Preflight pages: 5; official-template pages: 5; preflight table fit: `True`; official-template build ready: `True`.

3 Target Gap Table

Item	Status	Required action
AAAI-27 timing	ready-for-open-site	Register authors when the site opens; prepare abstract by 2026-07-21.
Target style	pass	Use paper/aaai27_official.pdf for AAAI-style review upload; do not upload the generic article-class PDF.
Page limit	pass-official-template	Keep official aaai2027 build under ≤ 7 technical-content pages plus references.
AAAI-27 preflight conversion	pass	Use paper/aaai27_official.pdf as the current official-template submission candidate.
Supplement policy	pass-with-main-body-caveat	Keep all critical claims in the main body because AAAI reviewers are not required to review supplements.
Reproducibility checklist and artifact instructions	filled-local-ready	Copy the filled local checklist answers into AAAI's official OpenReview fields when the site opens.
Submission system and official form	calendar-blocking-before-site-open	When OpenReview paper submission opens, upload the official PDF and complete the official reproducibility checklist fields.
AI-assisted authorship disclosure	draft-ready	Keep provenance notes and disclose assistance only in the target system or statement field if requested.
AI-generated first-stage review readiness	prepared	During author feedback, answer both human and AI-generated reviews with the same evidence discipline.

4 Verdict

The scientific package is strong-conference ready as a benchmark/theory paper. M20 passes both a conservative two-column US-letter preflight and an official aaai2027 anonymous submission-template build. The remaining upload boundary is the submission-system opening date and completion of the official reproducibility checklist fields.
